Subject: Petition entitled "Germany inflicts intentional grievous harm on other European Union members"

Dear Mrs. Montserrat,

I am addressing you as Chairman of the Committee on Petitions of the European Parliament.

In your welcoming address, you encouraged the right to petition to be exercised and the committee to be made aware of and remedy problems in the implementation of EU law.

On 16 August 2019, together with 60 other citizens of the European Union, I submitted a petition documenting violation by the Federal Republic of Germany of existing EU law, namely Article 2 TFEU – Rule of Law. I assume that this petition is before you. The petition fully complies with the rules and therefore there is no reason for rejection.

I also assume that you are aware that the petition was sent to all 751 Members of the European Parliament as well as the EBA, OLAF and GRECO and 1,406 international journalists, investigators and government officials.

Thousands of EU citizens are part of the 35,000 beneficiaries that have been victimized by this misconduct. Many of the EU countries have also been indirectly affected.

We have now learned from a reliable source that pressure from the German Federal Government, directly from the Chancellery, is being imposed to suppress this petition. This is the same incredible request coming from the same direction as we have experienced from the EBA vicinity. Such outrageous demands to be made to independent bodies in itself can be considered additional evidence that there is something of significance to hide by the German Federal Government under the leadership of Madame Chancellor Dr. Angela Merkel.

We as individual citizens can only rely on your integrity and the integrity of the committee members to help us right this terrible wrong that has now lasted over 13 years. Will the European Union continue to allow the Federal Republic of Germany to tarnish its reputation by continuing this corruption or will the rule of law prevail?

A Global Humanitarian Fund linked to the entitlements of the account holders exists for the benefit of all throughout the world. This program will be outside all existing programs and is weighted to supporting education and health centers in impoverished and emerging communities. All is ready to be launched.

We are not going away. We will not stop reporting this matter to the world. We won't stop until we find justice. Please ensure that this petition is accepted and assign the appropriate petition number as soon as possible that further supporters can join.

Please send your comments to fkwiller@

Yours sincerely

Klaus Willer on behalf of the petitioners and all affected the victims worldwide
